

Project Manager

ADI Systems requires a Project Manager for its expanding team of professionals based in Fredericton, New Brunswick, Canada.

ADI Systems has been offering wastewater treatment and waste-to-energy solutions for over 30 years. With over 265 installations worldwide, ADI Systems continues to be one of the world's leading suppliers of industrial treatment technologies.

Duties:

- Overall administration of projects
- Responsibility for project performance including procurement, costing, scheduling, quality control delivery, site safety, contract administration, and project status
- Responsibility for relationships with customers, consultants, and contractors
- Supervising site staff
- Writing proposals
- Cost estimating

Qualifications:

- Team leadership skills
- Willingness to travel
- Registered as a Professional Engineer or Engineering Technologist
- 2-20 years of experience with construction of commercial and industrial projects
- Exceptional communication skills, both written and oral

We offer a dynamic professional work environment for career-minded individuals.

If you are interested in working for a growing, multi-disciplined company, we encourage you to apply in confidence by e-mail, fax, or mail to the address below by **September 1, 2017**.
